Medical clinic is a fast way for interaction between patients, clinic doctors and staff, by ability to show doctor's available time, book appointment online, ...

By :

Vajiheh Seyedzadeh

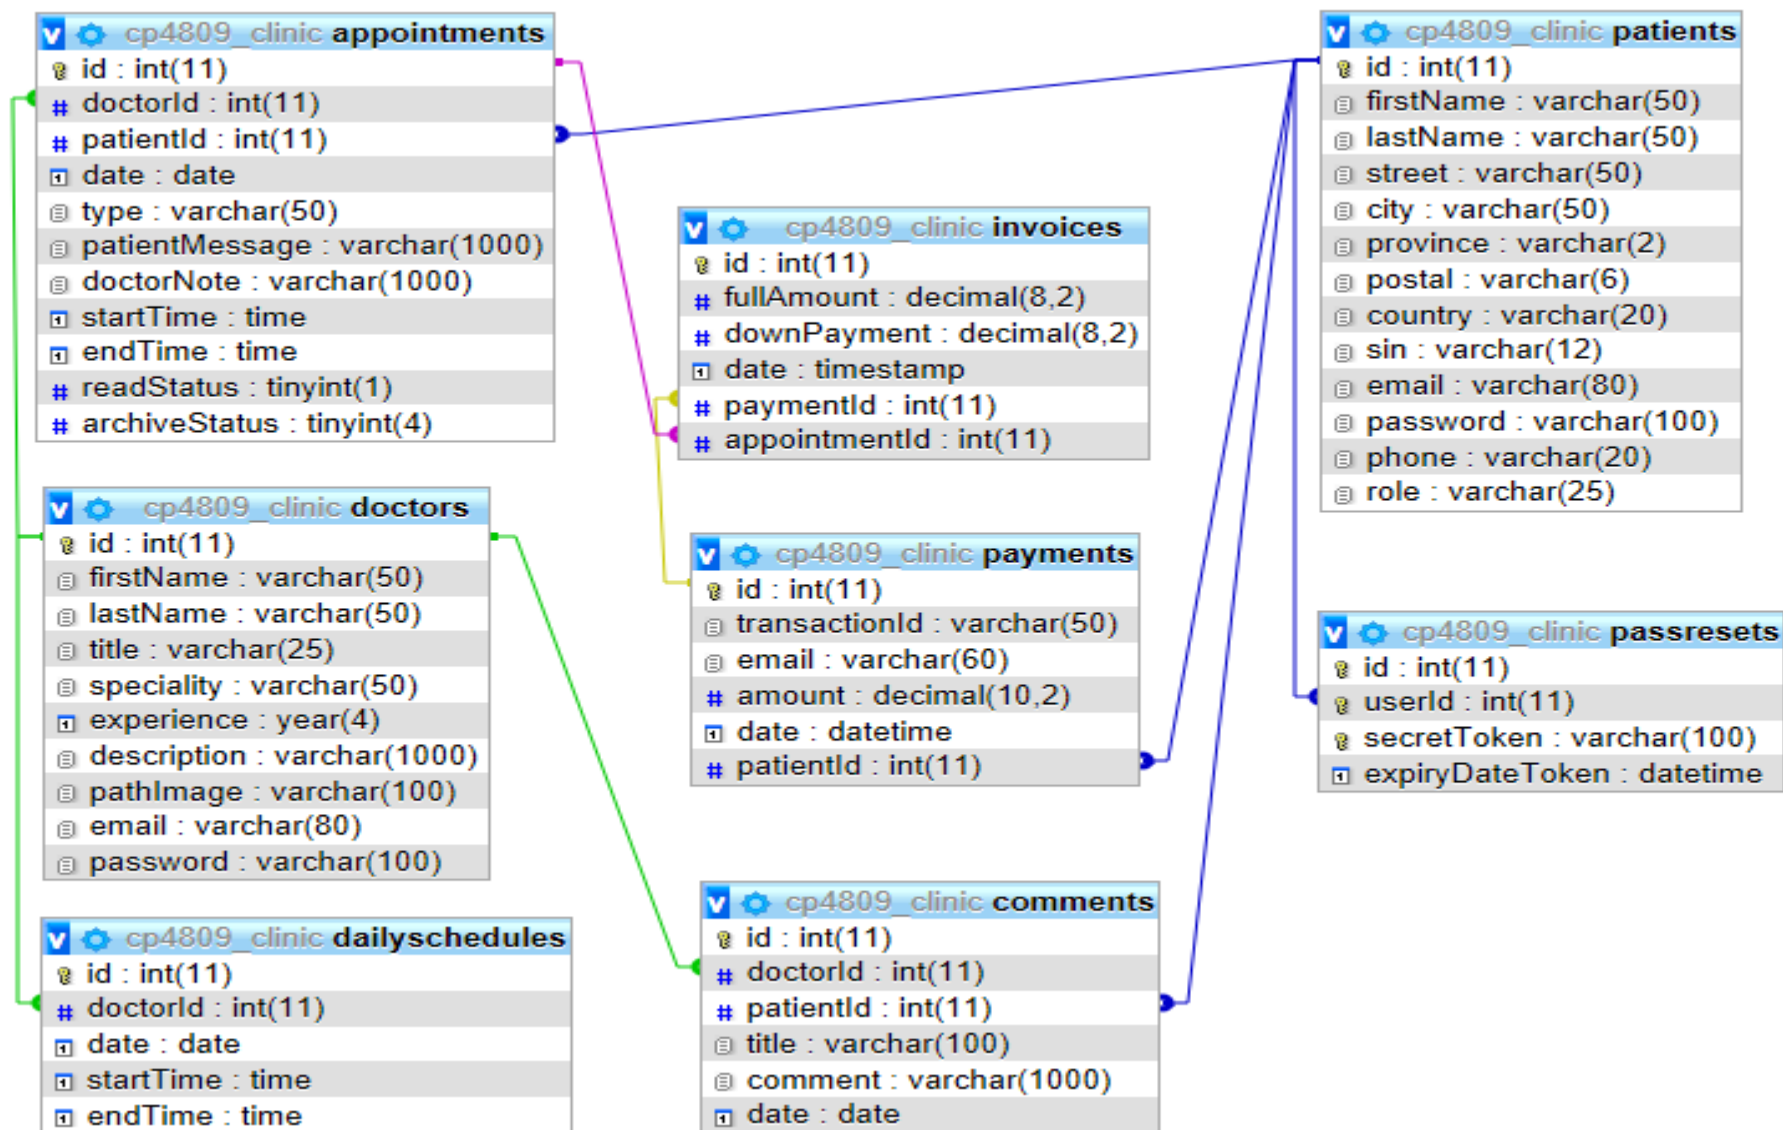

Winoto Janputra

Fall - 2017

Background

- Website to show clinic services, doctors, ...
- See doctor's available time and Make an appointment
- Ability to define and modify doctor's schedule by themselves
- Ability to see list of appointments in calendar view by doctors
- Show notification for new / cancel appointments
- Online Pre-Payment – Using pay-pal
- Add note to patient's profile by doctors
- **Goal: Make a fast way for interaction between patients, clinic's doctors and staffs**

DB Structure

Search doctors and See available times

Speciality:

Cardiologist

Search

- Ability to search doctors based on their speciality
- Ability to see doctor's information
- Show doctor's available time
- Select time and make appointment

What we learned:

- PHP using MeekroDB framework, Slim and twig template
- Ajax and jquery
- Paypal API
- WebSocket, Server-Sent Event

Future Works:

- Make access for patients to add comment for doctors

Thank you for your time!
